Experience

M&G Investment **November 2022 – December 2022**
Data Assistant 30 Dreyer St, Claremont Cape Town
[🔗 https://www.mandg.com/country/south-africa](https://www.mandg.com/country/south-africa)

As a data assistant, I played a crucial role in our company’s digital transformation. My responsibilities included digitizing historical documents and converting them into a digital format for secure and efficient storage in our database. This project not only preserved important company records, but also improved data accessibility and streamlined our archiving processes.

Kalamu Verein **July 2024**
Web Developer Germany
[🔗 https://www.kalamu-verein.de/](https://www.kalamu-verein.de/)

Develop and maintain a dynamic WordPress website to support Kalamu Verein, a Germany-based NGO dedicated to providing educational support to African countries. Implement user-friendly features and functionality to enhance user experience and engagement, ensuring the website effectively informs users and attracts potential investors. Collaborate with cross-functional teams to align website content and design with the organization’s goals and objectives. Optimize website performance, security, and accessibility to ensure a seamless browsing experience for visitors. Utilize SEO best practices to increase website visibility and drive traffic, contributing to the NGO’s outreach and awareness initiatives.

Materfamilia **July 2024**
Full stack developer Cape Town
[🔗 https://essmaterwebapp20241219165119.azurewebsites.net](https://essmaterwebapp20241219165119.azurewebsites.net)

I was responsible for both frontend and backend development, playing a critical role in ensuring the application’s overall functionality and seamless user experience.

On the frontend, I focused on creating intuitive and user-friendly interfaces that enhanced the overall usability of the application. This included designing and implementing responsive layouts, integrating modern UI frameworks, and optimizing for accessibility and performance. I worked closely with designers and stakeholders to translate requirements into dynamic, visually appealing components, while maintaining a consistent brand identity. My work also involved troubleshooting and resolving UI bugs, ensuring smooth functionality across multiple devices and browsers.

On the backend, I ensured efficient operation and smooth integration with external systems, focusing on building a robust architecture to handle complex workflows.

Additionally, I managed DevOps responsibilities by implementing and maintaining GitHub pipelines. This system guaranteed that all team members were running the latest version of the application without any interference, fostering a synchronized development environment. The pipelines also ensured that updates and deployments were seamless, with no adverse impact on the stability or performance of the main application.

Education

The IIE’s Varsity College Cape Town **March 2022 - December 2024**
Bachelor of Computer Science and Bachelor's degree
Information in Application Development
